

CORPORATE PROFILE

Notlim Technologies (NotlimTech) is a management and technology consulting company that provides information technology (IT) services, professional services, and health information technology services to the federal, state, and local governments. We are a Department of Veteran's Affairs certified Service-Disabled Veteran-Owned Small Business (SDVOSB). We specialize in providing service support and program management expertise in acquisition, program management, information technologies, medical and logistics management services. We bring value to our client's culture by maintaining professional standards, focusing on accountability by developing a task-driven matrix, and delivering on time and within budget.
